PROFESSIONAL SUMMARY

Results-oriented Software Developer with 3+ years of experience engineering high-performance mobile applications with **Flutter & Dart** and full-stack web applications with **JavaScript, React, and Supabase**. Strong background in building offline-first local architectures, reactive UI state management, and real-time backend synchronization. Dedicated to writing clean, maintainable, and user-focused software from concept to production.

TECHNICAL SKILLS

Mobile Development:	Flutter, Dart, Android Studio, Cross-Platform Architecture, Local Notifications, Offline Storage, Material 3 & Cupertino
Web & Front-End:	JavaScript (ES6+), React, HTML5, CSS3, Flexbox/Grid, RESTful APIs, Responsive UI, Web Accessibility (a11y)
Backend & Databases:	Supabase, PostgreSQL, Firebase (Auth/Firestore), SQLite, Hive, Row-Level Security (RLS)
Tools & Workflow:	Git, GitHub, VS Code, Postman, Netlify, Vercel, Figma-to-Code, Web Performance, Technical SEO

WORK EXPERIENCE

Freelance Mobile & Web Developer · Self-Employed Sep 2023 – Present | Abuja, Nigeria

- Architected and delivered cross-platform mobile features using **Flutter and Dart**, incorporating reactive state management, asynchronous streams, and offline caching.
- Integrated **Supabase and Firebase** backend services for user authentication, real-time database subscriptions, and cloud storage across applications.
- Built and deployed 10+ responsive client websites and web applications, boosting client user engagement metrics by an average of **25%**.
- Developed clean, reusable RESTful API modules with comprehensive error handling and network resilience.

Frontend Web Developer · Precious Ventures May 2022 – Sep 2024 | Abuja, Nigeria

- Engineered and maintained responsive web applications using **HTML5, CSS3, and JavaScript**, driving a **40% increase** in mobile web traffic.
- Audited and optimized front-end performance, reducing asset payloads and improving Core Web Vitals to achieve **20% faster load times**.
- Implemented semantic HTML markup and on-page technical SEO, resulting in a **30% boost** in organic search traffic.
- Collaborated with design stakeholders to translate UI wireframes into cross-browser compatible, accessible digital products.

FEATURED PROJECTS

WasteLess – Smart Household Food Tracker & Donation Network Flutter · Dart · Supabase · PostgreSQL

[[Video Demo](#) · [GitHub](#) · [Pitch Deck](#)]

- Built a production-ready Flutter mobile app enabling households to track food inventory, receive expiry push alerts, and donate surplus groceries directly to local shelters.
- Engineered a Supabase PostgreSQL database schema with Row-Level Security (RLS) policies and real-time feed synchronization.

Full-Stack E-Commerce Store [[Live Store](#) · [GitHub](#)] React · Node.js · JavaScript (ES6+) · Netlify

- Engineered an e-commerce platform with responsive catalog browsing, persistent cart state, dynamic price calculations, and Netlify CI/CD deployment.

Task Management & Workflow App [[GitHub](#)] JavaScript · Firebase · CSS3 Grid · Local Storage

- Created a productivity application featuring task categorization, real-time status updates, and browser local storage persistence.

EDUCATION & CERTIFICATIONS

B.Eng. in Electrical & Electronics Engineering – Kwara State University, Nigeria 2021 – 2026

Software Engineering Certification – Power Learn Academy 2025

Web Development Certification – Digital Skill Up Africa 2024
